

## New Project Ideas

Within Action 3, a set of new project was set up for possible submissions in future INTERREG projects in the New Programming Phase 2007-2013. All these new project ideas try to further develop the main IONAS aims and objectives and particularly to foster environmental sustainability and balanced socio-economic development.

Hereby the New Project Ideas set:

1. Working on the environmental impact of port activities through a remote sensing satellite system.
2. Developing a surveying system for acoustic and environment pollution in the Adriatic and Ionian area.
3. Definition and development of RFID (Radio Frequency Identification) systems.
4. Spreading IT systems for port activities management in the Adriatic and Ionian area.
5. Implementation courses / workshops on territorial and environmental management and EMS (Environmental Management System) and EMAS (Echo Management and Audit Scheme).
6. Coordination of existing projects and development of their extension.
7. Setting up an environmental security information centre in the Adriatic and Ionian area.
8. Creation of a database on hazardous traffic and goods in the Adriatic and Ionian area.

Next page is reporting the list of choices of IONAS Partners about the different proposal.

Click here for [an analysis of the choices and a further development](#) of the two most voted proposals.
