Preface

Our date with the Tourism Yearbook, now in its fifth edition, is again being renewed this year.

The resource, comprised of reliable, accurately quantifiable data regarding the main touristic and cultural indicators of the City of Venice and its Metropolitan Area, collected in line with reasoned principles, now constitutes a fundamental part of the work performed by the offices of the Councillorship for Tourism of the City of Venice.

As in previous years, its objective is to provide a tool that is useful for ensuring a better understanding and, above all, management of a sector like the tourist industry, an essential economic resource for our territory, which today calls upon everyone, public institutions, private entities and the community of the city alike, to pull together in implementing positive policies and actions that guarantee its sustainability.

The data provided here can only be a small part of the range of information on tourism available. However, they are certainly a reliable part of the larger resource, and can further increased by adding further information shared by other sources (e.g.: big data, private databases) or the analyses carried out by institutions, research centres, foundations and companies.

The desire to travel in, learn about, get to know and discover our city and our territory fails to be thwarted by crises or other setbacks; not even in the face of the most difficult, dramatic international events. This can only be seen positively, also as a response to those who, these days, by sowing terror and death, hope to pull a sad veil of fear and anxiety down over our everyday lives, making us change our lifestyles and habits and perhaps to give up our will to travel, and so discover and experience contexts other than our own.

Obviously this does not mean turning a blind eye to the contradictions and issues that mass tourism generates all over the world, but which, in a unique, fragile and precious environment like Venice, explode in a much clearer fashion.

So if the challenge then is sustainability, starting out with reliable, quantifiable data can help contribute to an objective, peaceful analysis of the phenomenon, and in turn this can be used as a basis for implementing real, practical and effective actions.

There are two facets to this objective: on one hand it is an attempt to obtain maximum benefit for our entire community and on the other, it strives to improve the

experience of our guests, introducing them to the more authentic and true Venice, with full respect for a wonderful, unique environment.

As in the past editions, the focus is on the data and indicators identified for the year which has just ended, comparing these with those registered in relation to the previous 5-year period.

From the Demand (number of incoming tourists, number of overnight stays, division of the tourists in the three areas of the Municipality and the Metropolitan City Area, focus on the various nationalities) it passes to the Supply (number and characteristics of the various accommodation facilities); it then continues by analysing the passengers who come to the Port, and to the airports in Venice and Treviso, the LTZ BUS passes issued by both by Venice and Cavallino Treporti Municipalities, the data on the traffic which passes through Piazzale Roma. There is then an analysis of the visitors to the city's official tourism website, Venezia Unica, followed by a section dedicated to e-commerce.

The second part analyses the visitors to the city's main Cultural Institutions, visitors to the temporary exhibitions and those attending live shows. This year to provide a wider picture of this section, we have added the official SIAE (Italian Society of Authors and Publishers) data, both for the City of Venice and the Metropolitan Area.

I would like to take this opportunity to acknowledge the work and commitment of all those who have promptly communicated the visitors flows directed to our city, enabled the data to be collected and helped to manage these information flows.

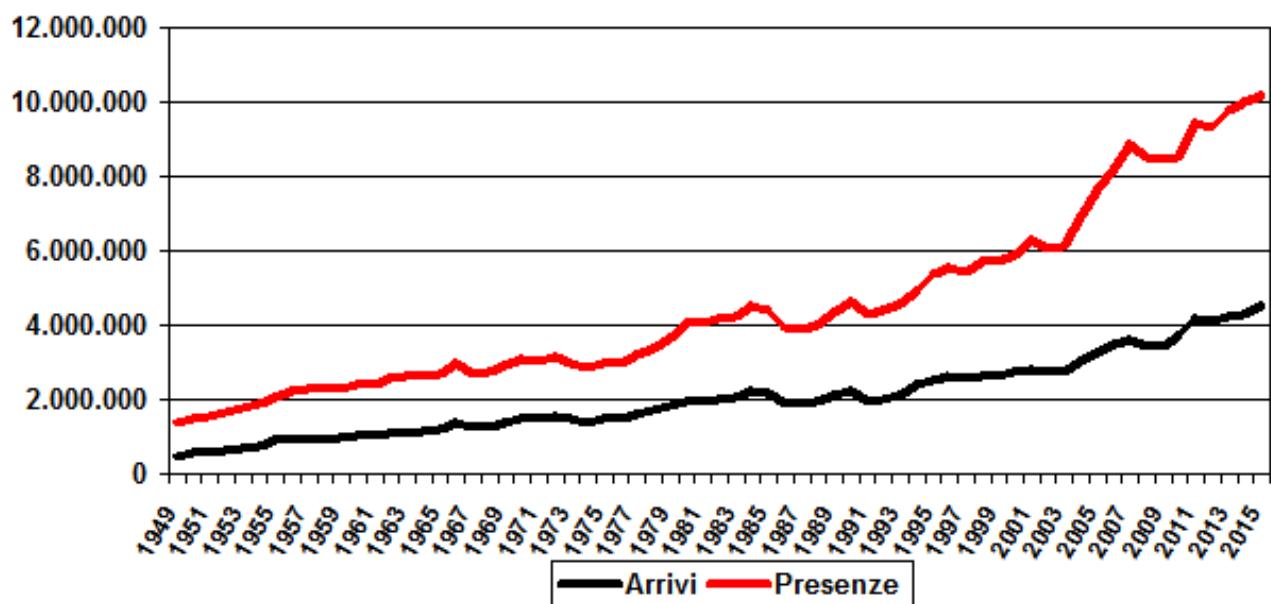

Paola Mar

Councillor for Tourism

The demand

Over the 2011-2015 period, arrivals (physical number of non-residents who arrived in the territory of the Municipality of Venice and stayed at least one night) rise from just over four million, one hundred thousand to nearly four million, five hundred thousand, while the number of overnight stays (total number of overnight stays) rises from just over 9 and a half million to over 10 million.

Even though the trend in 2014 is practically constant compared with the previous year, in 2015 the indicators again begin to rise.

The average period of stay, after four years during which it increased slightly, settles on the value of 2.26 days, the same as it was in 2011.

The hotel sector still welcomes the majority of guests, while the non-hotel sector is distinguished by a longer period of stay. This is attributable to the camping sites on the mainland with a significant number of beds where tourists stay for longer periods.

Foreigners account for more than 85 per cent of the entire tourist market and in 2015 their numbers continue to rise as they did throughout the last 5-year period, even if in the last year a drop in the average length of stay was registered.

The internal market fell from 14 to 13 percent. In 2015, the positive trend of the number of arrivals continues, whereas a slight drop in the overnight stays is noted compared with 2014.

The third quarter of the year (July, August and September) shows the highest number of overnight stays: like in 2014, July is the peak month of the 2015 season.

Venice alone welcomes around 60 percent of arrivals and over 65 percent of overnight stays with an average period of stay of 2.5 days. At the Lido, where slightly more than 4% of tourists stay overnight, after the slight decrease registered in 2014, in 2015 the trend picks up again, both for arrivals and overnight stays. The average stay here is the longest of the three areas; 3 days, thanks to the seaside tourism.

Finally, the mainland confirms itself as destination for 30 percent of the total tourists; the average stay here is the shortest, just over 1.8 days - a reflection of the tourism business and the fact that this is a prestigious area for short stopovers for organized tours that stay only for one night in the city.

Among the continents of origin, Europe is certainly the most consistent catchment area, followed by the Americas, Asia, Oceania, the Middle East and Africa.

The first 12 Countries in 2015 are, in descending order: USA, the UK overtaking France, China overtaking Germany, Japan, Spain overtaking Australia, South Korea overtaking Brazil, Canada, which remains stable, and Argentina, appearing for the first time in the top 12. Instead, for the first time ever, Russia fails to appear in the top 12.

The Americans confirm their title as the top foreign market: on the up since 2013, in 2015 they achieve an excellent performance with increases reaching double figures.

In 2015, the United Kingdom bypasses France, climbing into second position. The British, who have been increasing in number since 2011, also end 2015 with a net increment in both arrivals and overnight stays.

French tourists - despite their third position and downward trend, continue to represent a particularly interesting market for the city: they stay in Venice for on average almost three days, making theirs the longest average visit of all nationalities.

Thanks to an excellent trend, China overtakes Germany and confirms its role as one of the top emerging markets.

After losing ground in 2014, Germany inverts the trend, increasing both its arrivals and its overnight stays.

After Japan which, despite a sharp fall, retains its position in sixth place, we find the Spaniards, who consolidate the signals of recovery manifested in 2014, continuing to increase considerably in 2015.

The performance of South Korea is again notable, as it rises to ninth position, whereas the progress made by Brazil and Canada remains stable. And last but not least, Argentina, appearing for the first time in the *top 12*.

Nota metodologica

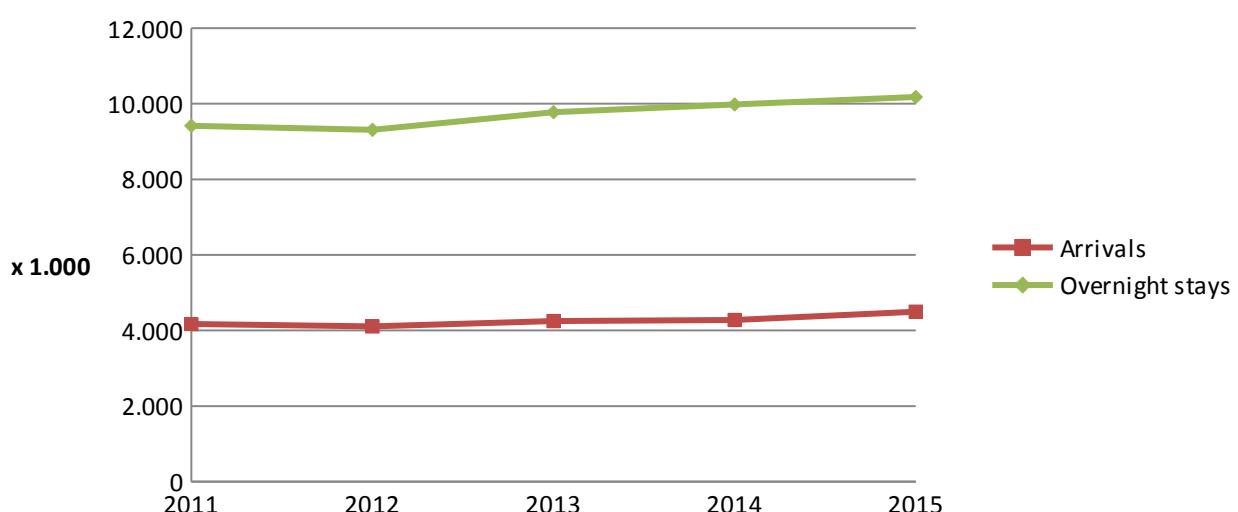

I movimenti degli ospiti (arrivi/presenze), ai fini delle rilevazioni statistiche, sono forniti dall'Azienda di Promozione turistica della Provincia di Venezia che li raccoglie direttamente dagli operatori delle strutture ricettive, secondo le disposizioni emanate dall'Istituto Nazionale di Statistica (ISTAT) e dalla struttura regionale di statistica e ai sensi dell'art. 13 comma 5 della vigente Legge regionale n. 11/2013 (che sostituisce il precedente abrogato art. 39 della L.Reg. n. 33/2002).

The supply

The analysis presents the overall accommodation supply and its development trends over the five-year period 2011-2015. The numbers of hotels and non-hotel accommodations steadily increase, as does the number of beds. In 2015 there is only a slight reduction in the numbers of beds on the Mainland in comparison with 2014.

Procedural note

The number and type of accommodation facilities for the entire 5-year period were provided by the Veneto Regional Authority – Regional statistic system section, whom we thank for their kind assistance..

Main infrastructures and services

Data presented below relate to passenger movement in the Port, Sistema SAVE Airports (Venice and Treviso), ticketing for local public transport (ACTV, Alilaguna, Terminal Fusina), the Limited Traffic Zone bus passes issued by Venice and Cavallino-Treporti Municipalities, and vehicle transits in the municipal car park and S. Andrea park in Piazzale Roma (excluding season tickets).

As for ACTV and Alilaguna ticketing, the analysis reports the number of travel documents sold at full price: online sales, sales to residents (IMOB / CartaVenezia) and sales at special rates (for example: reduced rates for groups) are excluded.

Cultural Numbers

The report presents the number of visitors to: permanent exhibitions of the Fondazione Musei Civici Venezia; state museums; church-run museums and churches; Fondazione La Biennale di Venezia; Peggy Guggenheim Collection; Fondazione Querini Stampalia; the Jewish Museum; the Naval History Museum; Torcello island (the Provincial Museum); Sale Monumentali Biblioteca Nazionale Marciana; Scuola Grande di San Rocco; Scuola Dalmata; Scuola Grande San Giovanni Evangelista; and the Scuola Grande dei Carmini.

This section also includes visitors to the International Exhibitions of Architecture and Contemporary Art of La Biennale di Venezia, because of the exceptional nature of such events which fully involve the city regularly, every year.

The monthly and annual numbers of visitors are provided for each institution (also per day, for temporary exhibitions), with their changes and trends. Of particular interest is the comparison with the data of the seasonality of arrivals and overnight stays: the peak numbers for users of cultural Venice do not coincide with the peaks in tourist numbers. The peak months are May, September and October.

There follow sections dedicated to visitors to temporary exhibitions and spectators of live performances.

For temporary exhibitions, the most visited exhibitions in the world, in Italy, and in Venice are ranked (*source: Il Giornale dell'Arte*). Only exhibitions with ticketing or entry which is not integrated with that of the host museum were considered, thus providing a classification of the total number of visitors.

Finally, the section for live entertainment provides data regarding the spectators of: Cinema, Theatre, Music and Dance at the Fondazione La Biennale di Venezia; Fondazione Teatro La Fenice; Teatro Goldoni (which became National Theatre in 2015), theatres from Settore Produzioni Culturali e dello Spettacolo of the City of Venice (Teatro Toniolo, Teatro Momo, Teatro della Murata; at the end of 2014, the partnership with Teatro Aurora and Teatro Fondamenta Nuove was interrupted); Centro Culturale Candiani; Teatrino Groggia.

This section ends with the data provided by the SIAE (years 2013-2014) for the City of Venice and the Metropolitan City of Venice.

Procedural note

Visitors to church-run museums and churches

- Venetian places of worship are normally open during hours of worship. Cultural and tourist

access to these places is guaranteed at other times, via free or paid entry. Below are the places that use people counting for tracking visitor traffic. Venice residents have free access, as has anyone who comes to pray.

- The St. Mark's Basilica has not been included as it does not actively monitor the number of its visitors.

Visitors to temporary exhibitions

- Taken into consideration here are exhibitions with separate ticketing, not integrated with the museums. The table was compiled based upon the total number of visitors. The final column shows the number of visitors per day..
- The 56th International Art Exhibition in 2015 featured 89 exhibitors in the historic Pavilions of Giardini, at the Arsenale and across Venice city centre, in addition to 44 related events throughout the city.
- The 14th International Architecture Exhibition in 2014 featured 65 exhibitors: 55 located in the exhibition areas of the Giardini and Arsenale and 10 located in the city's urban area, in addition to 22 related events officially recognized by La Biennale..

The 55th International Art Exhibition of La Biennale di Venezia in 2013 featured 88 exhibitors in the areas of Giardini and Arsenale and across the entire city, in addition to 47 related events officially recognized by La Biennale.

It should also be noted that:

- The 13th International Architecture Exhibition in 2012 featured 55 exhibitors and 18 related events.
- The 54th International Art Exhibition in 2011 featured 89 exhibitors and 37 related events.
